**60-BRT
HYBRID**

a brand of North American Bus Industries, Inc.

BRT (Bus Rapid Transit)

The BRT is available in 37', 42', 60' and 65' lengths making it a popular alternative to entice riders out of their cars and encourage them to give public transportation a try. The BRT's open design allows better visibility. It also gives the bus a brighter, sunny interior environment and it gives riders the sense that the buses are more spacious. The dramatic styling of the BRTs with their curved lines and contemporary looks offers a cost effective alternative to expensive light rail.

Technical Specifications

	37-BRT	42-BRT	60-BRT	65-BRT
Passenger Capacity	36	44	63	71
